VI—LAND SETTLEMENT

No. 29—Land Settlement on the 30th June, 1960

Particulars	Area	Area
I.—Absolutely Alienated :—		
Area sold by public auction or other forms of direct sale or otherwise alienated up to 30th June, 1960	acres	acres
.....	27,343,902
II.—In Process of Alienation on 30th June, 1960 :—		
Free Homestead Farms	331,383	
Conditional Purchase	11,102,490	
Selections under the Agricultural Lands Purchase Act	273,192	
Grazing Land	976,062	
Town and Suburban Lots	3,725	
Crown Grants of Reserves	71,955	
.....	12,758,807	
Total Area alienated or in process of alienation on 30th June, 1960	40,102,709
III.—Leases or Licenses in Force on 30th June, 1960 :—		
Issued by Lands Department :		
Pastoral Leases	216,908,871	
Special Leases	4,271,305	
Leases of Reserves	916,246	
Residential Lots	4,595	
Perpetual Leases	1,431,126	
Issued by Mines Department :		
Gold-Mining Leases (a)	18,936	
Mineral Leases (b)	40,337	
Miners' Homestead Leases	33,727	
Issued by Forests Department :		
Timber Permits (c)	4,024,720	
.....	227,649,863	
IV.—Area Neither Alienated, in Process of Alienation, nor Leased	356,836,228	
Total Area of Western Australia	624,588,800	

(a) Exclusive of 494 acres on "Private Property." (b) Exclusive of 2,006 acres on "Private Property."
 (c) Includes Permits for cutting Wandoor for tanning purposes, amounting to 153,014 acres, but excludes Permits and Licenses for cutting timber and firewood in Goldfields areas.

(a) Includes Free Homestead Farms and Reserves.

VII—PRODUCTION

No. 31—Estimated Net Value of Western Australian Production

For Primary Industries, net value of production is derived by deducting all marketing costs and the value of goods used in production (seed, fertiliser, pickling, sprays, dips, fodder, fuel and oil, etc.) from the value realized "at the principal market." For Manufacturing, it is obtained by deducting the value of goods consumed in the process of production (i.e., materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings) from the selling value "at the factory door."

Year	Agricultural	Pastoral and Trapping (a)	Dairy, Poultry and Bee Farming	Forestry and Fisheries	Mining and Quarrying	Total Primary	Manufacturing

§ Annual Declaration. (a) Defined for basic wage purposes as the area comprised within a radius of 15 miles from G.P.O., Perth. (b) As defined in the Land Act but excluding the Metropolitan Area. (c) Rates for divisions shown not specifically declared by Court. (See letterpress in June, 1942, issue.) (d) Relates to certain specified Goldfields Districts only. (e) Rates declared in Basic Wage Adjustment and Order No. 1 issued under the authority of National Security (Economic Organization) Regulations. (f) Beginning of first pay period. (g) Beginning of next succeeding pay period. (h) Interim Basic Wage declaration authorized under amendment to National Security (Economic Organization) Regulations, operative first pay period after date thereof. (i) Special determination incorporating increase of £1 for males and 15s. for females. (j) Female rate increased to 65 per cent. of male rate as from 1st December, 1951. (k) Female rate increased to 75 per cent. of male rate from beginning of first pay period commencing on or after this date.

No. 46—Minimum Rates of Wages payable to Adult Workers under Awards of Arbitration Authorities
and Industrial Agreements, as at 30th September, 1960

Rates relate to the Metropolitan Area except where otherwise stated, and are shown to the nearest farthing

XIV—METEOROLOGICAL STATISTICS

(Supplied by courtesy of the Deputy Director, Meteorological Services)

No. 48—Notes on the Rainfall and General Weather Conditions in Western Australia during July, August and September, 1960

July

General—Apart from the first week of July, anticyclones were of a transitory nature and active depressions, mainly of southern origin, were the predominating weather control during the month.

They extended well into the State south of the tropics and occasionally to the tropics. In the second half of the period, they were responsible for strong winds, to gale force at times, over the southern half of the State and the adjoining ocean areas, and local flooding at a number of places in the agricultural districts.

Cold southerly air at the rear of the depressions reduced temperatures and snow fell in the south.

Air, road and rail communications were interrupted by floods and strong winds temporarily disrupted telephone services.

Rainfall—Very little rain occurred in the tropics in July. There were a few light amounts in the West Kimberley during the first week but with the exception of Broome the month's rainfall were below normal.

Elsewhere, however, few stations failed to reach the July average and surpluses were considerable, amounting to twice the normal in parts of the West and East Gascoynes and the North Coastal sub-division and to thrice the normal in parts of the South-Eastern division. Several stations, notably Meekatharra, Kalgoorlie and Merredin reported the highest July totals on record and the last named received its worst flood in 30 years.

The falls were spread over the last three weeks with the bulk occurring in the latter half and the greatest totals were received over the Darling Ranges from Dandaragan southward and in the far South Coastal region.

More than ten inches over the catchment areas of the Metropolitan Water Supply relieved apprehension concerning the ability of the dams to cope with Perth's requirements during the following summer.

The three to six inches which fell throughout the agricultural areas provided excellent sub-soil moisture for the growth of cereal crops and pastures.

Temperature—Although temperatures were above normal in the tropics during the month day temperatures were below normal elsewhere, particularly after the first week when above normal registrations were restricted to periods of brief duration.

Night readings on the other hand were mostly above normal and, on occasions and in several areas, greatly exceeded the normal.

However the deep southerly streams which followed the extensive southern depression, lowered day and night temperatures, at times to produce heavy frosts over the southern half of the State and snow on the Stirling Ranges and in the Mount Barker district during the last week of the month.

Metropolitan—Although the total rainfall received in 1960 to the end of July was less than may normally be expected, the July total of 738 points was half an inch more than the average and with the earlier winter rains placed Perth's water storage position on a more satisfactory plane.

Day temperatures were lower than usual at this time of the year and on the 19th one of the coldest July days was experienced when the maximum in the daylight hours failed to rise above 50.7° and the day's maximum occurred at midnight.

The month was more windy than normal and gusts exceeded 50 m.p.h. on three occasions. Cloud reduced the sunshine total as two days in three were wet. Heavy rain in the Swan catchment caused floods in the low-lying suburbs during the third week.

August

General—Although high-pressure systems were the controlling influence of the weather in August this was due, not to the absence of southern depressions, but to the rapidity of their movement.

There were several disturbances, which extended northward to embrace most of the State south of the tropics and gave promise of normal August rains, but they quickly passed eastward and produced only very light to light falls.

Rainfall—As a result of the absence of slow-moving depressions the rainfall totals in August were almost everywhere below normal and they resembled what could have been obtained from a couple of good rain-bearing disturbances.

The best totals were received in the south-west and south coastal areas, particularly on the south coast where Hopetoun reported one of the only two above-normal totals in the State. Away from these regions disparities became more marked and over the bulk of the wheat areas, although there were a number of instances wherein 50 per cent. of the normal rainfall was received, most totals fell 70 per cent. to 80 per cent. short of the average and, in the Gascoyne and North-Eastern divisions amounted to only a few points.

Something more resembling the normal would have been welcome in the pastoral areas but in the agricultural districts the absence of the usual rain was not regarded as serious. The sub-soil contained much moisture still from the splendid falls in July and an effect of far greater benefit to the crops and pastures than normal rain was achieved through the amount of light and warmth obtained during the periods of fine weather.

Temperature—Day temperatures were mostly above normal in the tropics during the month but night readings, except in the De Grey division, were below. Elsewhere maxima and minima were below normal in the South Coastal sub-division and to a lesser extent in the Gascoynes and over most of the inland areas.

The cold spell towards the close of July extended to the first few days of August when day and night readings fell to extremely low values and on the 2nd Mundiwindi reported the lowest night temperature ever recorded in this month and Rawlinna experienced the coldest night since records commenced.

Many frosts, severe at times, were reported from the southern divisions in the first half of the month and again in the last week, but although day temperatures were low early in the month they were not so noticeable later, and most days either approximated or exceeded the normal temperature.

Metropolitan—This August was one of the driest and coldest experienced. The mean temperature was lower on only three previous occasions and the mean minimum temperature was the fourth lowest since records commenced.

The minimum temperature of 36.9° which was recorded at Perth on 1st August was the lowest temperature recorded since 1956.

With 264 points of rain recorded on 14 days, Perth experienced the sixth driest August on record. The monthly total was 307 points below the August normal and left a deficit of 411 points in the normal expectancy for the period January to August.

September

General—The main rain-bearing disturbances during the month originated from low-pressure troughs along the West Coast which induced a stream of warm moist tropical air over most of the region south from the tropic.

The only exceptions were a small secondary depression which formed south of Cape Leeuwin on the morning of the 22nd and by midday of that day had intensified to an extent that warranted the issue of gale warnings to shipping and a weak cold front which passed over the South-West division on the 27th. This latter in itself, brought little rain but it was followed by a low-pressure trough which prolonged the westerly stream across the southern half of the State and continued to produce light falls daily over the southern areas until the end of the month.

Rainfall—The rainfall for September was above average in the Fortescue division and at many places in the West and East Gascoynes, mainly as a result of the influx of tropical air to these regions in the first half of the month.

The South-Eastern division, where the monthly totals exceeded an inch at many places, and around Marvel Loch, Bullfinch and Westonia, where they exceeded two inches, also participated at this time and the good rains extended north to Menzies (140 points) and Laverton (88 points) and to Yandal station where one and a half inches comprised the monthly total.

Over the remainder of the State most stations in the agricultural districts received good falls and the totals exceeded the average over the southern portion of the North Coastal sub-division, in the North-Eastern and Central agricultural districts and throughout the Eastern agricultural areas.

In the southern and south-eastern agricultural areas above average amounts were not so general but the rains were very good and deficiencies were small.

The areas to benefit least were the Central and South Coastal sub-divisions. Here, although falls ranged mainly between two and three inches for the most part, the average expectancy is such that deficiencies of over one inch and at a number of places exceeding two inches were reported.

Temperature—Except in the Kimberleys both day and night temperatures were for the most part below normal in the tropics although deficiencies were slight. In the first week, day readings in the De Grey division were considerably above normal. Port Hedland reported 96° (10° above normal) on several occasions and there was a slight rise again toward the end of the month when Roebourne and Marble Bar each reported 99°.

The highest maximum was 105° at Wyndham on the 24th.

Over the remainder of the State temperatures mostly approximated the normal except in the South Coastal sub-division where minima were in excess.

Few frosts were reported, mainly in the first week. The lowest minimum was 30° at Bridgetown on the 2nd, the same station experiencing 31° on the 6th and 32° on the 3rd and again on the 4th and 18th.

Cold conditions were experienced on several days in the Wandering districts where the minimum fell to 32° on the 2nd, 6th, 7th and 18th.

Metropolitan—The rainfall in Perth during September amounted to 255 points which was 66 points below the average and rendered the total rainfall for this year 477 points below the normal expectancy for the first nine months.

The mean temperature for the period was slightly below normal and ranged from 39.7° on the 6th to 73.1° on the 4th.

Strong winds up to 59 m.p.h. were experienced on the 23rd.

XVI—BUILDING OPERATIONS

No. 53—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by governmental agencies and the activities of "Owner-Builders." The term "Owner-Built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

(a) For the purpose of the Census, a "dwelling" is any habitation occupied by or for occupation by a household group living together as a domestic unit, whether comprising the whole or part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-roomed shack to a multi-roomed hotel or institution.

(b) Persons (both passengers and crew) not enumerated elsewhere who at midnight between the 30th June and the 1st July, 1954, were on board ships or were travelling on long-distance trains or aircraft.

(c) Represents population at Census, 30th June, 1954, plus natural increase and recorded net migration since that date. Figures subject to revision after the next Census.
